BENNY [REDACTED] is not dead.

KENNY. Of course she is. She...left. She...My mom and dad met in med school. Got married. Had us. And then Mom. She felt like my dad was not with her or us. Like he was distant, which he is. If you want proof that space cannot be traversed he's it, and eventually she got tired of it.

KENNY. And she moved away - Ed doesn't remember this. She was leaving him. She was going to get a place with Mr. Simons. Bill. And then when they were set up, she was going to come get us. But then, a month later, she got her diagnosis.

A brain tumor. And she knew it would be too confusing for Ed and me, both things at once. So she left Mr. Simons and came back to my dad. But only for us. And only to die. She left him. She came back. She left us all. And then he left Edith and me.
